

# CUTLERY TRAY

Cutlery trays (CT) are designed to fit inside a custom drawer box and can be removed. Six (6) standard designs are offered; however, custom designs can also be constructed with customer supplied drawings. Trays are constructed as follows;

- 3/8" thick sides and interior members, with eased top edge.
- 1/4" thick matching bottom (Lenga uses birch plywood bottom).
- Tray height is custom made to be 1/8" lower than the top of the drawer box.
- If a standard design is not specified, it will be automatically selected based on the width of the cutlery tray.
- The minimum depth for CT-1 thru CT-6 designs is 15". If a cutlery tray is less than 15" front to back (depth) it will automatically be converted to a CT-1B thru CT-6B design.
- Custom designs can be constructed if a drawing is supplied.
  - the "Custom" price is applied if there are less than or equal to 6 interior parts.
  - the "Complex Custom" price is applied if there are more than 6 interior parts.
- If a tray is over 4" high or not Lenga an additional charge is applied.
- The standard for dimension 'A' is 3".
- Vertical divider(s), dimension 'B', are evenly spaced across the tray.
- The standard for dimension 'C' is 5".

## THE WAVE KNIFE BLOCKS

The rare blend of exceptional design and function comes together in 'The Wave' Knife Block Series. Pleasant contours and optimal knife storage come together in a stunning manner.

- Graceful contours are pleasing to look at.
- Choose from 9 slot knife block (WKB56PF) and 15 slot knife block (WKB90PF).
- Combine with any Century Silverware or Utensil Tray Inserts to create the ultimate in drawer organization. (See pages 10-13).
